

Cybersecurity Industry Certification Program

CSIC by Cyber Academy, the training arm of CyberLancers. Offline cybersecurity training in Mysuru focused on SOC, SIEM, threat hunting, digital forensics, and incident response.

Duration	4 months / 16 weeks
Learning Mix	80% practical
Hours	298 theory + 342 practical
Mode	Offline in Mysuru

What You Learn

The program is built around defensive cybersecurity work: monitoring security events, investigating logs, tuning SIEM detections, handling evidence, responding to incidents, and communicating findings clearly.

Tools Covered

Wazuh, Splunk, IBM QRadar, MISP, Volatility, Zeek, Nmap, Python, and Bash.

Program Modules

1	Security Foundations	Networking, operating systems, scripting, security concepts, and analyst fundamentals.
2	SOC and SIEM Operations	Alert triage, dashboards, detection logic, Wazuh, Splunk, and IBM QRadar workflows.
3	Threat Hunting and DFIR	Threat intelligence, MISP, Zeek, evidence handling, timelines, and Volatility memory analysis.
4	Incident Response	Containment, eradication, recovery, reporting, capstone scenarios, and career readiness.

Admissions and Fees

Admissions path: application, Rs. 500 entrance test, interview, and final offer. Fee tiers listed: Rs. 59,000, Rs. 1,19,000, and Rs. 2,00,000. Tier names, inclusions, GST note, contact details, and batch date should be confirmed before publication.
